

**What about online security?**

Payment by Paypal is a trusted way of buying items on the net and transferring money into accounts. There are many safety features inbuilt to the site to protect your security including online security and encryption and it is one of the safest ways to pay online.

**PLEASE NOTE:**

After your transaction to purchase GEA membership, Paypal will only confirm your purchase, they will never email you to ask for any of your details (e.g. credit card number etc.).

As with any internet financial service you may note that on rare occasions you may receive spam emails purporting to be from Paypal or other financial companies. Please treat such emails with care.

To help you work out whether an email is legitimate, please note that no Paypal email will ask you for details of your bank/debit card pins, numbers or password and email address.

If you think that you have received a fraudulent email, please forward the original email to [spoof@paypal.com](mailto:spoof@paypal.com) and then delete it.
